Special Provision No. 08-0117(3)

EFFECTIVE DATE: January 1, 2010

SUBJECT: Bituminous Surface Treatments.

Alabama Standard Specifications, 2008 Edition, SECTION 401, shall be amended as follows:

SECTION 401 BITUMINOUS SURFACE TREATMENTS

401.01 Description.

(a) GENERAL.

This Subarticle (401.01(a)) shall be replaced by the following:

The work covered by this Section consists of basic bituminous treatments such as prime coat, asphalt flush coats, liquid seals, and bituminous surface treatments.

This Section also covers the work of applying a bituminous surface treatment containing a polymer additive.

Each bituminous treatment shall consist of one or more hot applications of bituminous material and, except for prime coats, includes a specified cover aggregate which shall be spread after each bituminous application.

The work also includes the cleaning of the existing surfaces as well as furnishing and applying all materials, and necessary incidental work thereto, all in accordance with plan details and these Specifications.

401.02 Materials.

(a) BITUMINOUS MATERIALS, SECTION 804.

This Subarticle (401.02(a)) shall be replaced by the following:

(a) BITUMINOUS MATERIALS, SECTION 804.

The grade of bituminous material shall be within the following limits unless the kind and grade are specified on the plans or in the proposal.

1. PRIME:

Emulsified Asphalt

AE-P or NTSS-1HM

Cutback Asphalt

MC 30 or MC 70 for tight bases;

MC 250, RC 70 or RC 250 for open bases.

Emulsified Petroleum Resin

EPR *

* This material shall not be used as a prime on processed reef shell base courses, crushed aggregate base courses, or rubblized concrete. This material shall not be left exposed for more than four days before placing a base layer of asphalt over it. This material shall also be supplied from the producer in the form in which it shall be placed. Material in a concentrated form that requires dilution after delivery will not be allowed.

2. ASPHALT FLUSH COAT:

Emulsified Asphalt

CRS 2

3. LIQUID SEALS AND SURFACE TREATMENTS WITHOUT POLYMER ADDITIVE:

Liquid Asphalt Binder

PG 58-22

Cutback Asphalt	RC 250, RC 800, MC 800
Emulsified Asphalt	CRS 2, CRS 2h

4. LIQUID SEALS AND SURFACE TREATMENTS WITH POLYMER ADDITIVE:

Liquid Asphalt Binder	PG 64-22 *
Emulsified Asphalt	CRS 2p, CRS 2hp, CRS-2l

* This liquid binder shall be manufactured from PG 58-22 with polymer additive to achieve the PG 64-22 grade.

Where the plans require the placement of a bituminous plant mix overlay over a bituminous surface treatment or liquid seal, the overlying layer shall not be placed until the asphalt in the bituminous surface treatment or liquid seal has cured to the satisfaction of the Engineer. Curing time is dependent upon several factors including temperature, humidity, and wind velocity. When emulsified asphalt is used, curing begins with a distinct change in color, from brown to black, and proceeds until the asphalt satisfactorily retains the aggregate.

Traffic stripe on each layer shall be provided and paid for in accordance with Section 701.
